

## Mini Inverter Series

Interruptible unit equipment 720W

### Housing

- 14-gauge steel
- White semi-gloss powder-coat paint finish

### Mounting

- Surface mount

### Lamp types operated

- LED
- Incandescent
- Fluorescent
- Operating switched, normally-on or normally-off fixture types
- Incandescent, LED, fluorescent lamps and ballast combinations, including triac dimmable ballasts (consult factory if DALI dimming)<sup>1</sup>

### Load capacity

- 720W
- Line voltage allows for remote mounting of the emergency fixtures at distances up to 1000 feet

### Electronics

- High-efficiency pure sine wave inverter
- Temperature compensated charger
- Replaceable charger output fuse protection
- Low battery voltage disconnect
- Unit comes standard with electronic lockout and brownout circuits

### Controls

- Standard with a non-audible self diagnostic/charger is fully self-contained, fully automatic microcontroller-based system
- Optional audible auto diagnostic available
- Standard lighting control override for 0-10V dimming systems

<sup>1</sup>When using Hi-Bay fixtures or screw in type lamps, please consult the factory.

### Load shedding for 0-10V fixtures

- During a power outage the emergency fixtures are dimmed to field selectable levels of 25%, 50% or 75% brightness output. Reducing wattage draw from the fixture will allow for more fixtures to be connected to the Mini Inverter.
- Replaceable Inverter output fuse protection (two replacement fuses included, when load shedding option is ordered only)
- Maximum 100 emergency fixtures can be daisy chained per circuit

### Nexus® Option

- Units equipped with Nexus® self-testing monitoring system circuitry shall self-test, in accordance with NFPA101, Life Safety Code minimum 30 seconds every 30 days, and 90 minutes annually as well as keep a history of all testing logs, plus feature a real-time diagnoses, as well as, be able to locate exact fixture location while notifying service personnel to the status of the fixture via email notification. Nexus® system interface with an improved minimum load lost detection of 10%.

### Sealed maintenance-free battery

- 12V oversized valve regulated lead-calcium (VRLA) battery
- Provides 90 minutes of emergency operation

### Power requirements

- Choice of voltage 120V in/120V out or 277V in/277V out operation, 60Hz

### Approvals

- UL 924 Standard
- Meets or exceeds all National Electric Code and Life Safety Code Emergency Lighting Requirements

### Warranty (subject to proper installation and maintenance)

- Battery has a 3-year full, plus 7-year pro-rata warranty
  - Unit has a three-year warranty (excluding lamps and fuses)
- Detailed warranty terms located on page 202 or online at: [www.emergi-lite.com/usa/files/EL\\_Warranty.pdf](http://www.emergi-lite.com/usa/files/EL_Warranty.pdf)

All Emergi-Lite® inverter products receive 100% quality inspection before shipment to ensure proper and satisfactory operation.

How to order

Series	Capacity	Voltage	Diagnostic feature	Options
EMIU	-720= 720W	Blank= 120/120VAC or 277/277VAC	-Blank= Advanced Diagnostic, non-audible <sup>1</sup> -AD= Advanced Diagnostic, audible <sup>1</sup> -NAD= No Advanced Diagnostics <sup>4</sup> -NEX= Nexus® wired -NEXRF= Nexus® wireless -NEXP= Nexus®Pro IoT <sup>3</sup>	-D3= Time delay (15 minutes) -SAC= Service alarm contact <sup>2</sup> -4= 4 output circuits -4-LD= 4 output circuits with load shedding for 0-10V fixtures

Example: EMIU-720

<sup>1</sup>Minimum load required: 10% of unit capacity

<sup>2</sup>Service alarm contact (SAC) shall provide a 24V signal, the charger board will indicate a fault by choosing a contact.

<sup>3</sup>Available on EMIU-720-4 and EMIU-720-4-LD

<sup>4</sup>When using a transfer device (automatic load control relay) you must choose the NAD option
